FDD Abstract

25X1

PERSONNEL REPORT FOR THE SECOND QUARTER OF 1952 MADE BY CHIEF OF PERSONNEL, MINISTRY FOR MINING AND SMELTING, TO THE MINISTRY OF INTERIOR (3 pp; German: [redacted])

25X1

This 3-page document consists of a typewritten personnel report for the second quarter of 1952 made by the Chief of Personnel, (fnu) Ramolla, of the GDR Ministry for Mining and Smelting, to the Ministry of Interior.

The report gives an analysis of employment statistics for the Ministry, showing an increase in the table of organization as a result of the creation of a security inspection unit. Totals are also given for personnel employed, transferred and dismissed. In this connection the report states that these changes have resulted in an improvement of the social caliber of the personnel.

A comparison is drawn between personnel statistics for the first and second quarters. Past and present job titles of personnel affected by the changes are also given. Statistics on the former membership of personnel in the National Socialist Party, and on personnel who formerly were prisoners of war in the USSR and the Western countries, are given.

Key enterprises are criticized for failure to insist on timely training of adequate technical personnel. The report states that this problem is to receive special attention during the third quarter of 1952. Mention is made of a decree issued by the Ministry of Interior concerning the improvement of personnel work.

A listing is given of major personnel changes made in the various enterprises during this period. Some details are given concerning the transfer of former SAG Radsatzfabrik Ilseburg (Wheel Set factory) to the GDR. A brief discussion of new work methods for personnel sections is given. Mention is made of the adverse effect of the People's Police recruiting drive on the availability of personnel. Brief mention is made of the liaison between the Ministry for Mining and Smelting and the Ministry of Interior.
